Subject: Dimock - Scribe Imports

[Ex. 4 - CBI]

Hope your data import is going well. I have a couple files for you to import into the Dimock_EPA Scribe database. The "Monitoring Data Import 12_0215.csv" should be imported into the Monitoring Data Table in Scribe. This file contains the field screening results (turbidity, alkalinity, ferrous iron, and dissolved sulfides) for each sample. The "Dimock Water Cloudiness Summary for Scribe Import.csv" should be imported into the Water Sampling Data Category. This import is to bring in sample related comments. I would map the Samp_No and Location fields in Scribe to the Samp_No field in the csv file, and the Remarks field should automatically match.

Please let me know if you have any questions.

Thanks,

Suddha Graves
